This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

UNIV. OF CALIFORNIA

INTRODUCTION.

To the Alumni of West Virginia University:

The alumni of any institution of learning are its greatest asset and the closer the connection between them and the Alma Mater the better. For this reason your Alma Mater has made it a special task as one of the features of the celebration of its fiftieth anniversary to hunt out as far as possible the graduates of these fifty years and list them anew and mail this list to every living alumnus. Many of these alumni had not been heard from for several years and ten are still missing at this writing. The 1500 now living and found are scattered through forty-four states, nine foreign countries, District of Columbia, Porto Rico, and the Hawaiian Islands. Hundreds have remained in West Virginia and are found in the lead in all trades, professions and occupations, a body of men and women of whom any institution may justly feel proud.

During the early years of the University lists of alumni were published from time to time as part of the annual catalogue. A more complete list, "The Alumni Record," prepared by Waitman Barbe was published by the Alumni Association in 1903. In 1913 an "Address List of Alumni" was prepared by James Scott Stewart, Waitman Barbe and David Dale Johnson, an editorial committee appointed by the Board of Regents.

The present list was compiled by Rex B. Hersey, Secretary of the University Y. M. C. A. Mr. Hersey's work has been carefully revised by the President and the University editor and extended comparisons have been made not only with the previous lists of 1903 and 1913 but with the catalogues and the original records of the Regents, the Executive Committee and the Faculty, and it is believed that the pages following contain accurate and complete lists of the graduates of West Virginia University from 1870 to the present time. For greater convenience three lists are given: one by classes, one alphabetically arranged, and one showing living alumni grouped according to their place of residence.

Information as to any of the missing alumni whose names are found on the enclosed slip or as to any errors or omissions in regard to names, dates or present addresses which you may detect will be very gladly received.

The University is anxious to keep in close touch with you and to that end will always welcome any information in regard to your movements and achievements. This is still your University. Has it helped you by making you able to cope successfully in life's struggles? If so, show your gratitude by keeping in close touch with us and by lending your influence wherever you can for the advancement and upbuilding of your fostering mother.

FRANK B. TROTTER.

May 15, 1917.
